## **EXHIBIT A**

## **CLAIMS UPON ENTRY OF THE AMENDMENT**

- 1. (Amended) An antibody or antigen binding fragment thereof which is specifically reactive with a polypeptide or an antigen fragment thereof, wherein the polypeptide is characterized as:
  - (a) having an amino acid sequence corresponding to the carboxy terminal amino acids of a connective tissue growth factor (CTGF) protein;
    - (b) binding to heparin and being eluted from heparin with about 0.8 M salt; and
    - (c) having a molecular weight of about 10 kDa to about 20kDa by reducing SDS-PAGE,

wherein the polypeptide has an amino acid sequence beginning at about amino acid residue 247 or amino acid residue 248 from the N-terminus of CTGF, and has mitogenic and chemotactic activity.

- 2. The antibody of claim 1, wherein the antibody is polyclonal.
- 3. The antibody of claim 1, wherein the antibody is monoclonal.
- 4. The antibody of claim 1, wherein the antibody is a human antibody.
- 5. The antibody of claim 1, wherein the antibody is a single chain antibody.
- 6. The antibody of claim 1, wherein the antibody is a humanized antibody.
- 7. The antibody of claim 1, wherein the antibody is an antibody fragment.
